NEXT STEPS

1. Create CR's using actual product codes from specific product lines. (see example next page)
 - Application of the special is very important as well as a layout if available.
 - The Price It Pro -Create module located within the Propel APP can assist with -additional . instruction.
2. We recommend that a MOCK UP is placed prior to order submission for oversized screens to assist in viewing the feel and function within the office space.
3. Please contact your local Technical Service group for assistance as needed.
4. If your project requires a large quantity of screens, please obtain lead time confirmation using the Order Preview process.
